

JOB OPPORTUNITY

Principal Director of Moodle (PHP) Platform Engineering — DACH

Hiring company: Northstar Learning Systems GmbH

Company website: <https://www.northstar-learning.example>

Company headquarters: Berlin, Germany

Job-board source ID: HF-987654321

Employer requisition ID: NLS-ENG-2026-042

Vacancy reference: NLS-ENG-2026-042

POSTING STATUS

Applications are open now. The Apply button is active, and Northstar Learning Systems is currently accepting applications for this position.

Application deadline: 31 August 2026 at 23:59 Central European Summer Time.

ROLE OVERVIEW

Northstar Learning Systems GmbH is hiring one Principal Director of Moodle (PHP) Platform Engineering for its DACH product organization. This person will lead the technical direction of the Moodle learning platform while remaining hands-on with architecture and critical implementation work, and will manage

the platform engineering department and its three team leads.

The role owns the reliability, security, extensibility, and delivery of a multi-tenant learning platform used by universities and professional training providers. It works closely with Product, Information Security, Customer Success, and executive leadership.

KEY RESPONSIBILITIES

- Set the architecture and engineering strategy for the Moodle platform.
- Lead and develop three engineering team leads and an organization of 24 engineers across Germany and Czechia.
- Design and review object-oriented PHP services, Moodle plug-ins, REST APIs, event-driven integrations, and PostgreSQL data models.
- Establish engineering standards for automated testing, observability, performance, security, accessibility, and incident response.
- Coordinate quarterly platform releases and migration programs for enterprise customers.
- Partner with the CTO on technical investment decisions and communicate delivery risks to executive stakeholders.
- Participate in critical production incident response when escalation is required.

REQUIRED EXPERIENCE AND SKILLS

- Demonstrable experience leading a platform or software engineering

department and managing managers or team leads.

- Expert knowledge of Moodle architecture and modern object-oriented PHP.
- Strong experience with REST APIs, PostgreSQL, Linux, distributed systems, automated testing, continuous delivery, and cloud infrastructure.
- Experience operating secure, highly available SaaS products at scale.
- Ability to communicate technical strategy clearly in English.
- Professional working proficiency in either German or Czech is required; fluency in both is preferred.

PREFERRED EXPERIENCE

- PHPUnit, XDebug, Redis, Kubernetes, OpenTelemetry, and AWS experience.
- Experience in education technology, accessibility standards, or regulated enterprise environments.
- Previous responsibility for engineering budgets and vendor selection.

COMPENSATION

Employer-provided base salary: EUR 145,000–175,000 gross per year.

This is the base salary range for this vacancy. It does not include the annual performance bonus of up to 15%, a EUR 1,500 home-office equipment allowance, travel reimbursement, pension contributions, or equity.

The compensation package also includes company stock options. Equity is offered as part of compensation, with the grant determined by level and

location.

For comparison only, the HireFlow job platform displays its own estimated total compensation range of EUR 180,000–220,000. That figure is a platform estimate, not the employer-provided base salary for this role.

EMPLOYMENT

- Work schedule: Full-time, 38 hours per week.
- Employment type: Permanent employment.
- Contract: Indefinite employment contract directly with Northstar Learning Systems GmbH.
- This is an employee position; it is not freelance, temporary, seasonal, or independent-contractor work.
- Paid benefits include 30 days of annual leave, employer pension contributions, private health coverage, paid parental leave, and an annual learning budget.

WORKING ARRANGEMENT AND LOCATIONS

Location type: Hybrid.

The contractual job locations are:

- Prague, Czechia
- Berlin, Germany

Employees normally work from one of those offices two days per week and may work remotely for the remaining three days. Remote work must be performed within the European Union and within three hours of the CET/CEST time zone. Occasional travel between Prague and Berlin is expected.

The Prague and Berlin job locations must not be interpreted as additional company headquarters. The company's only explicitly identified headquarters is Berlin, Germany.

APPLICATION PROCESS

Select "Apply now" and submit a CV plus a short statement describing relevant Moodle and engineering-leadership experience. Applications received before the deadline will be reviewed on a rolling basis.

The process consists of an introductory recruiter call, a discussion with the hiring manager, a technical and organizational case study, and a final leadership conversation. Northstar Learning Systems may close the vacancy early only after an appointment has been made; as of this posting, applications remain open.
